DETAILED ACTION

1. Claims 1-4 are pending in this application.

Specification

2. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, claim 3 lacks any structure to define the "recording device".

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishida et al. (US 5,729,525; hereafter Ishida).

Regarding claim 1:

Ishida discloses a method of recording information on a recordable multi-layer record carrier, said record carrier comprising a first information layer and a second information layer for storing information (see Fig. 5A; layer 74 and 76 corresponds to first and second information layer, respectively), wherein the information is recorded such that an area containing information on the first information layer and an area containing information on the second information layer are of substantial equal size and such that both area's are superjacent (see Fig. 5B; in the first information layer, data are recorded from position 6 to position 10, and in the second information layer, data are recorded from position 11 to position 80).

Regarding claim 2:

Ishida discloses the method according to claim 1, wherein at least one area comprises a sub-area comprising dummy data, said sub-area having a size significantly smaller than the size

of the area (see Fig. 5B, area between position 15 and position 80 corresponds to a sub-area, and reference number 79 corresponds to dummy data).

Regarding claim 3:

Ishida discloses the method according to claim 1, wherein the information to be recorded is evenly distributed over all layers of the multi-layer record carrier (see Fig. 5B).

Regarding claim 4:

Ishida discloses a recording device for recording information on a recordable multi-layer record carrier, wherein said device is operative for executing a method according to claim 1 (see col. 10, lines 26-31; it is inherent that Ishida discloses a recording device that performs the recording).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ito et al. (US 7,184,377) is cited, because Ito et al. disclose an recording method for recording information onto multi-layered optical recording medium, wherein the medium includes a middle-zone region.
